

KNMI is involved in a few Crowd Sourcing activities:

- WOW-NL: Dutch portal in collaboration with the MetOffice since 2015; an update including recent activities in bias correction;
- Estimating city-average air temperatures from smartphone battery temperatures for Amsterdam;
- City sonde project for NO₂ measurement (2015);
- Using car sensor data, cooperation with Beijer Automotive who developed Vetuda that collects car sensor data using CAN-bus, a controlled area network to exchange sensor data within a car
